

The Internet Edge: Social, Technical, And Legal Challenges For A Networked World

Here's why blockchain is a game changer for IoT

Leveraging blockchain for your IoT data offers new ways to automate business processes among your partners without setting up a complex and expensive centralized IT infrastructure.

Blockchain's data protection fosters:

- Stronger working relationship with your partners
- Greater efficiency as partners take advantage of the information provided

		
Enable IoT devices to participate in blockchain transactions	Reimagine the world's most fundamental business interactions; open the door to invent new styles of digital interactions	Reduce the cost and complexity of operating sustaining business
