

Moon: A Brief History

A myth among the Native American Seneca tribes claims that a wolf sang the moon into existence. In the Western world, the study of the history of the Earth was, until the early eighteenth century, still dominated by the biblical account of the Creation, and the same account settled the history of the moon. Moon: A Brief History is filled with lunar factoids like these: how the Moon formed four and a half billion years ago, probably when a Mars-size body collided with Earth and threw off a disk of material that eventually coalesced into an orbital partner; how what we call the dark side is not actually dark; and how. The first realistic story about travelling to the Moon was a book called From the Earth to the Moon by Jules Verne published in 1865. It was followed by a book called the First Men in the Moon by H G Wells. In the late 20th century science fiction novels about human beings colonizing the Moon became common.
